Netherlands — Available immediately • Open to visa sponsorship

PROFESSIONAL SUMMARY

Data & Analytics Engineer with 7+ years of experience delivering end-to-end analytics products for global organizations across LATAM. Proven track record translating complex business requirements into trusted, production-grade data solutions using SQL, Python, Databricks, Microsoft Fabric and Power BI. Strong background in data modeling, Medallion Architecture and stakeholder management across international Agile teams. Currently based in the Netherlands, available for on-site interviews and immediate start, seeking Dutch employers able to sponsor long-term residency.

TECHNICAL SKILLS

Languages: SQL, Python, JavaScript | **BI & Analytics:** Power BI, Tableau, Looker

Data Platforms: Databricks, Microsoft Fabric, AWS (S3, Athena)

Development Tools: Git, GitHub, DBeaver, Azure Data Studio, Streamlit

Expertise: Analytics Engineering, Data Modeling, Semantic Modeling, Data Quality, ETL Validation, Dashboard Development, UAT, Stakeholder Management

PROFESSIONAL EXPERIENCE

PepsiCo — Data & Analytics Engineer 2025 – 2026

- Delivered 4+ end-to-end analytics products supporting commercial operations across LATAM, translating business requirements into production-ready solutions that enabled data-driven decision-making.
- Designed and validated enterprise data models across Databricks and Microsoft Fabric using Medallion Architecture, ensuring trusted Gold-layer datasets that powered Power BI dashboards and standardized business reporting across LATAM.
- Investigated and reconciled millions of records across Salesforce, SharePoint and enterprise platforms to resolve data quality issues, partnering with Product Managers, Data Engineers and QA teams to ensure successful UAT, reliable product releases, and user adoption.

PepsiCo — Analytics Engineer 2023 – 2025

- Developed analytics products for Revenue Management across LATAM, translating business requirements into scalable reporting solutions.
- Built SQL-based validation processes across Bronze, Silver and Gold layers, improving data quality and increasing confidence in enterprise datasets before production deployment.
- Performed root-cause analysis across enterprise data pipelines, identifying and resolving data inconsistencies before release, reducing production issues and supporting successful product delivery.

WIWI — Data Analyst 2022 – 2023

- Analyzed multi-million-record telecom datasets (GPS, DNS traffic, usage) and built a predictive model forecasting weekly mobile data consumption per vehicle for operational budgeting.
- Built an automated Python/AWS reporting pipeline and self-service analytics apps.

Freelance — Data Analyst / BI Developer 2022 – 2023

- Designed custom BI dashboards (Power BI, Looker Studio, QlikView) by gathering client requirements and translating them into interactive, KPI-focused solutions.

Colegio Monteverde — Innovation Technology Specialist 2017 – 2021

- Led digital transformation initiatives, implementing a cloud-based IT support platform (<24h resolution time) and applying NLP to streamline ticket classification from 29 to 10 categories.

INTERNATIONAL VOLUNTEER EXPERIENCE

Cultural Events & Digital Projects — Soka Zonnewende, Netherlands 2026 – Present

- Coordinate operations for cultural events, supporting kitchen, hospitality and volunteer teams.
- Developing a digital onboarding application to standardize volunteer training.

Tutoring and Process Digitization — IDEM, in collaboration with IPADE Business School 2019 – 2026

- Tutoring for female university leaders and young professionals, developing business skills through the Case Method.

EDUCATION

M.Sc. Data Science — Universidad Panamericana 2026

B.A. Philosophy — Universidad Panamericana 2016
