Available immediately for on-site interviews in the Netherlands • Open to visa sponsorship (Kennismigrant)

Professional Summary

Data & Analytics Engineer with 7+ years delivering end-to-end data products for global organizations, and an M.Sc. in Data Science. Proven track record translating complex business requirements into trusted, production-grade solutions using SQL, Python, Databricks, Microsoft Fabric and Power BI, with strong foundations in data modeling and Medallion Architecture. Also shipped predictive and NLP models in production, including consumption forecasting on multi-million-record telecom data and NLP-based ticket classification. Available for on-site interviews in the Netherlands and an immediate start, seeking a Dutch employer able to sponsor long-term residency.

Technical Skills

Languages & Query: SQL, Python, JavaScript, DAX

Data Platforms: Databricks, Apache Spark, Microsoft Fabric, AWS (S3, Athena)

BI & Analytics: Power BI, Tableau, Looker Studio, Streamlit

ML & AI: scikit-learn, pandas, time-series forecasting, NLP, LLM API integration and prompt design (OpenAI, Anthropic)

Tools & Methods: Git, GitHub, IBM DataStage, DBeaver, Azure Data Studio, Agile/Scrum

Expertise: Analytics Engineering, Data & Semantic Modeling, Medallion Architecture, Data Quality, ETL Validation, UAT, Stakeholder Management

Professional Experience

PepsiCo — Data & Analytics Engineer

2025 – 2026

- Delivered 4+ end-to-end analytics products supporting commercial operations across LATAM, translating business requirements into production-ready solutions that enabled data-driven decision-making.
- Designed and validated enterprise data models across Databricks and Microsoft Fabric using Medallion Architecture, delivering trusted Gold-layer datasets that powered Power BI dashboards and standardized reporting across LATAM.
- Reconciled millions of records across Salesforce, SharePoint and enterprise platforms to resolve data quality issues, partnering with Product Managers, Data Engineers and QA to ensure successful UAT and reliable releases.

PepsiCo — Analytics Engineer

2023 – 2025

- Developed analytics products for Revenue Management across LATAM, translating business requirements into scalable reporting solutions.
- Built SQL-based validation processes across Bronze, Silver and Gold layers, improving data quality and increasing confidence in enterprise datasets before production deployment.
- Performed root-cause analysis across enterprise data pipelines, identifying and resolving data inconsistencies before release, reducing production issues and supporting successful delivery.

WIWI — Data Analyst

2022 – 2023

- Analyzed multi-million-record telecom datasets (GPS, DNS traffic, usage) and built a predictive model forecasting weekly mobile data consumption per vehicle for operational budgeting.
- Built an automated Python/AWS reporting pipeline and self-service analytics apps.

Freelance — Data Analyst / BI Developer

2022 – 2023

- Designed custom BI dashboards (Power BI, Looker Studio, QlikView) by gathering client requirements and translating them into interactive, KPI-focused solutions.

HCL Technologies — ETL Developer

2021

- Built data extraction routines with IBM DataStage, supporting ETL workflows feeding enterprise data stores.

Colegio Monteverde — Innovation & Data Specialist

2019 – 2021

- Applied NLP to classify and route support tickets, consolidating 29 categories into 10 and cutting manual triage across the organization.
- Led digital transformation initiatives, implementing a cloud-based support platform that cut resolution time to under 24 hours.

Selected Projects & Publications

- Personal data portfolio** — cristinahermar.github.io, a hand-built static site documenting analytics and ML projects, with CI deployment.
- Vega Ledesma, J. G., **Hernández Márquez, C.**, & Chávez Arrieta, A. (2020). Modelo de clasificación para la adopción de medios digitales en la Banca de Inversión [Classification model for digital media adoption in Investment Banking]. *Research in Computing Science*, 149(8), 123–134.

Education

M.Sc. Data Science — Universidad Panamericana

2026

B.A. Philosophy — Universidad Panamericana

2016

Certifications & Languages

Certifications: Data Analytics (Ironhack), Power BI for Business Intelligence (EBAC), User Interface Design (EBAC), Full Stack Python (in progress)

Languages: Spanish (Native), English (C1), Dutch (A1, in progress)

Volunteer Experience

Cultural Events & Digital Projects — Soka Zonnewende, Netherlands

2026 – Present

Coordinate operations for cultural events; developing a digital onboarding app for volunteer training.

Tutoring and Process Digitization — IDEM, with IPADE Business School

2019 – 2026

Tutoring female university leaders and young professionals through the Case Method.
